

PDM30 Series

DOMESTIC WATER SUPPLY CONTROLLER

PDM30 series intelligent water pump drive is defined as a small helper for domestic water supply. PDM30 has household appliances appearance design style, compact size; backpack installation, dustproof & waterproof, small-pump frequency conversion control, extended connection, complete functions, reliable and stable performance.

Single-phase 220V: 0.75-2.2kW

Let The New Technology Drive Your Intelligent Life

The optimized PID control algorithm makes each time of frequency adjustment smoothly and naturally, brings quiet into your home.

It's new and better

Upgraded Appearance
Flexible and Multi-purpose, Domestic Good Helper
Promotion of Functions and Performance

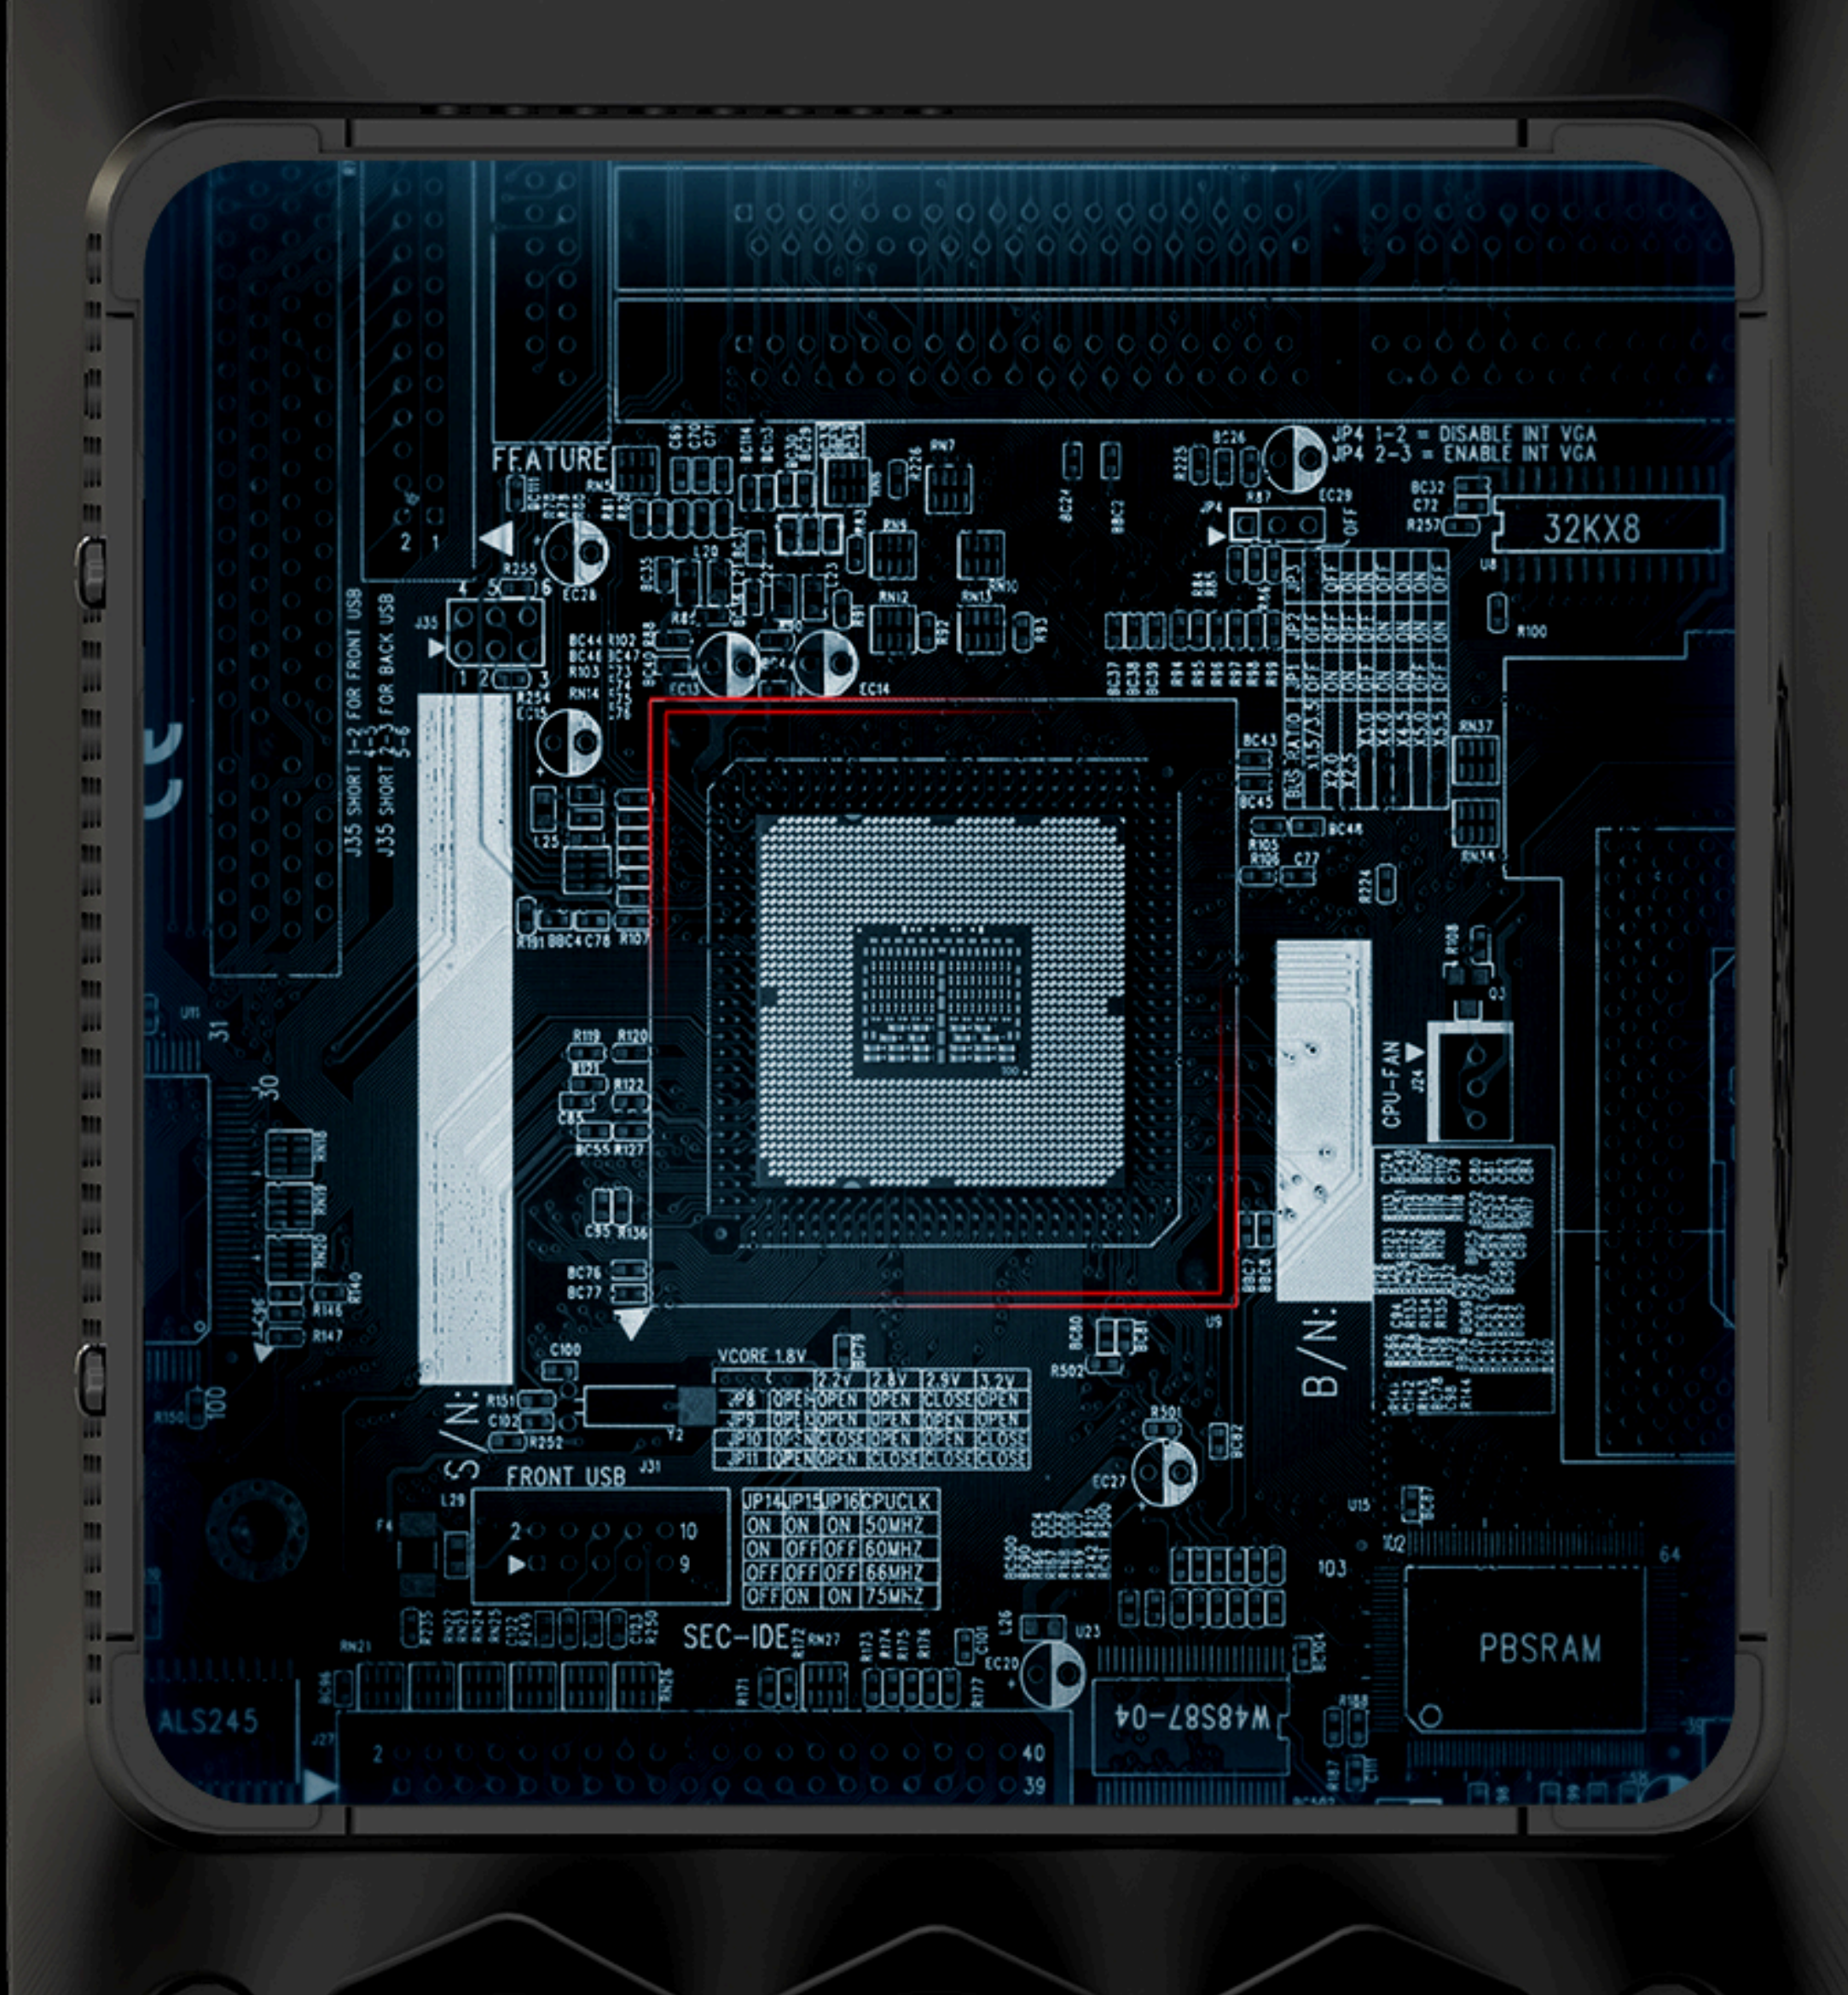

Fashion Appearance Humanized keyboard design

Small Size, Streamlined Appearance Back-pack mounted, more elegant and convenient. IP54 Protection Level Dustproof and waterproof. Dual Pressure Display Setting Pressure and real-time pressure show together, more convenient.

Advanced hardware security and stability

Brand-new hardware solutions, Imported chips and components, advanced design concept and the forefront of the industry design standards

High-quality fan Sunken cooling structure

220v Voltage, Suitable for Domestic Pumps 0.75-2.2kw, domestic pump application. Single Pump / Multi-pump Linked, Smart PID algorithm Equipped with RS485 interface, making the small-pump control able to achieve multi-pump link functions.

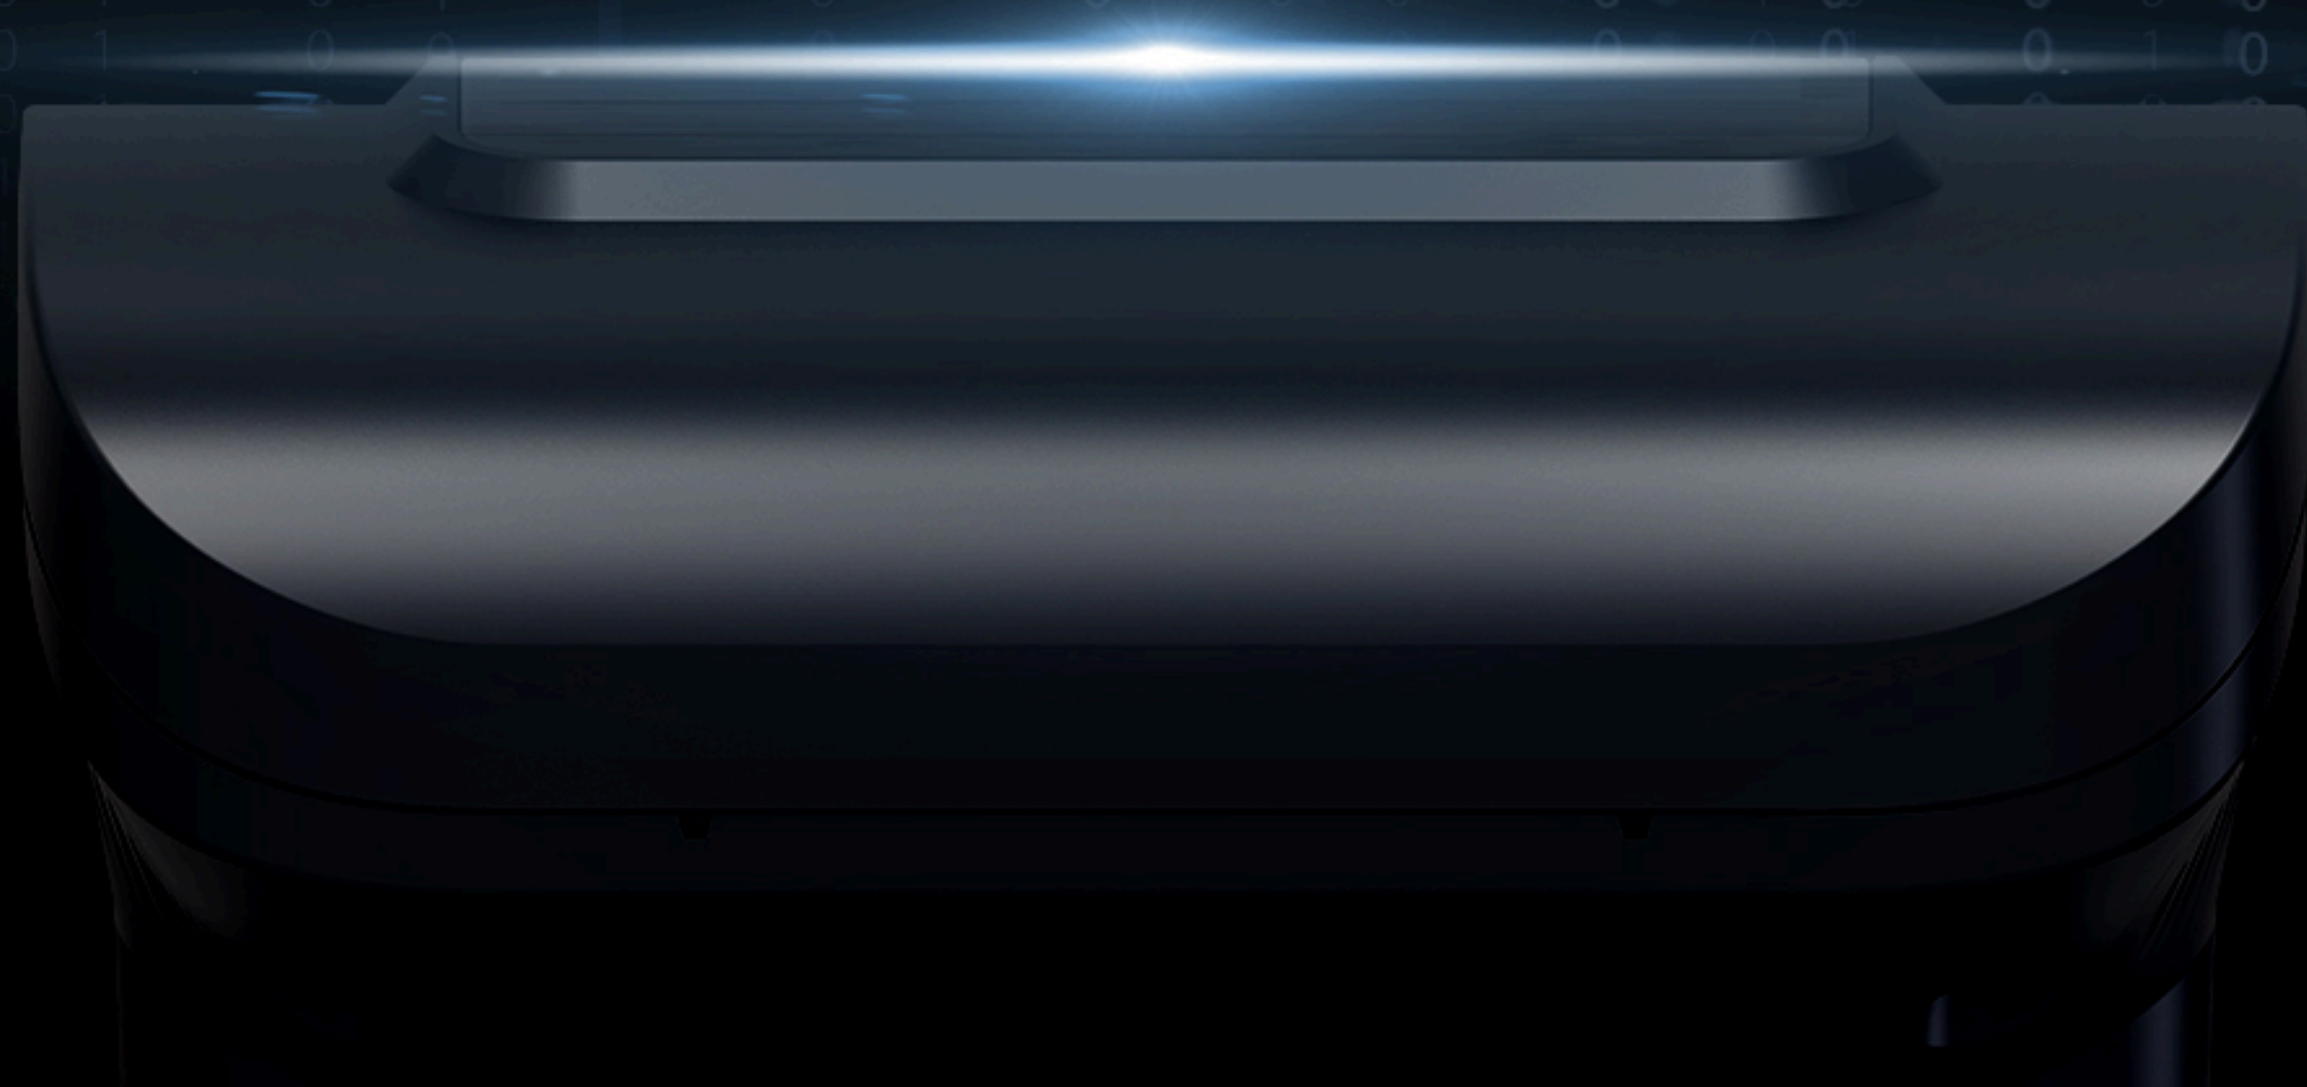

MSEM Multi-pump on-line without interference

Equipped with RS485 interface, making the small-pump control able to achieve multi-pump link functions.

Optimized performance algorithm for intelligent enjoyment of silence

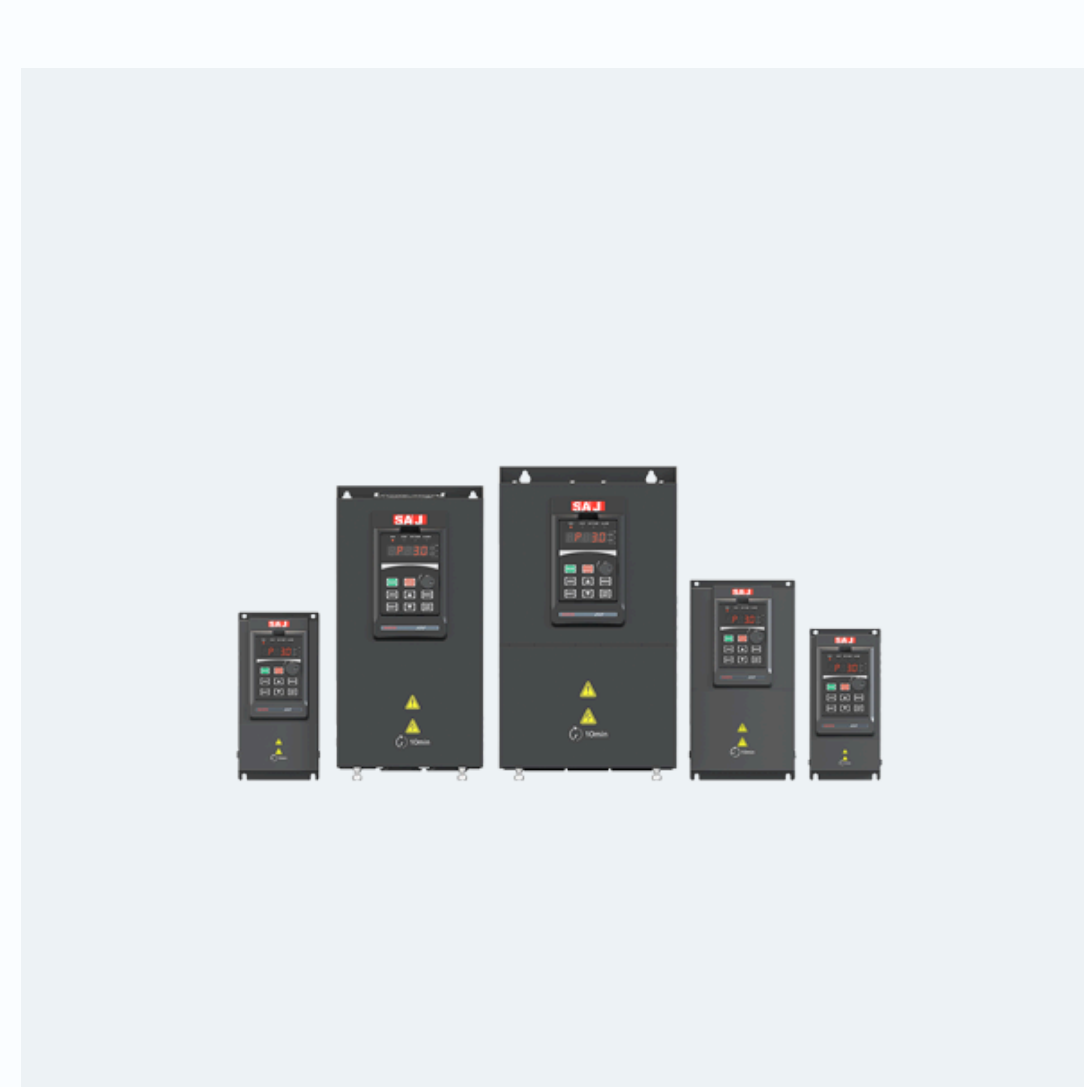

Optimized performance algorithm, the latest PID technology, so that every frequency modulation smooth natural; Electromagnetic noise optimization processing, give you a quiet and comfortable beautiful space
